ABSTRACT:
Gunadarma University is one university-based computer to streamline the academic process is therein, although not yet well integrated into one system with another system. This includes writing a description of the making of the Integrated Systems Laboratory Practice Module Gunadarma University. The purpose of creating this system is to create a module system which is independent laboratory, which eliminates the possibility of cooperation from fellow students, more enabling assistant in the preparation lab module, assessment is more objective because it is performed by the system. Object-oriented language used to describe this system is UML (Unified Modeling Language) with a visual modeling tool Star-UML. UML is a collection of the best techniques that have proven successful in modeling large systems and complex.
