Key Words : ASSIGNING EMPLOYEES, PRODUCTION DIVISION, THE HUNGARIAN METHOD

ABSTRACT:
Human resources play an important role in the process of increasing productivity in a company. Qualified human resources are needed in a company. Placement of human resources in line to their expertise is necessary for the optimum time results in the placement process can be calculated based on the employee's total time in doing the work assigned and the accuracy of effective employee based on the time execution of each production unit. Also as a basis for discussing the use of literature in the placement of relevant staff in order to know the maximum benefit amount of time conducted by PT. Andi Mebel in the placement of employees by using Hungarian Method.
