ABSTRACT :
The writing of this report discusses Accounting Information System Analysis of Fixed Assets at PT. Pembangunan Jaya Ancol. Accounting Information System (AIS) is very important for any company whether at large or small scale. One of the activities carried out in this system is the reconciliation of fixed assets. Fixed assets are assets used in business activities or operations. The purpose of this paper is to reveal the procedure of reconciliation of fixed assets manual and computerized, to uncover how a good company policy on issues of fixed assets reconciliation system does, and to reveal the constraints faced. The results of the reconciliation activities in the systems and procedures manual and computerized are done to adjust the fixed assets that are not listed in the accounting and administration, in order to get a new database and find assets that are still there or not owned by the company.
