Key Words: PROCEDURES, EXPORT AND RETURN, BATTERY

ABSTRACT:
Export is one of the company's activities, because the existence of our exports is to increase foreign exchange. These activities include export procedures with the parts involved. In export activities, there is less possibility of returns, as when return happens, it will arise a record. The purpose of this practical work is to find out the export procedures and product returns batteries at PT. Energizer Indonesia by observing the strengths and weaknesses to determine if in accordance with the existing theory. The results obtained showed that the export and return procedure of battery at PT. Energizer Indonesia has been going well and every part of it runs properly.
