Key Words: DECISION MAKING, ACCOUNTING DIFFERENTIAL, ACCEPT OR REJECT.

ABSTRACT:
Differential accounting information is estimated to analyze the difference of assets, income, and/or costs that are influenced by decision making in the action alternatives. In scientific writing, the author discusses about what should be done by the company before accepting or refusing an order that is by first analyzing the differential costs so the company can know whether to get more profit if you accept or reject the special order. After the writer has done the calculations for a special order cabinet doors 2, the analysis results can be seen that the income differential that is equal to USD $ 4 million higher than Rp 2,042,275 from the cost differential is Rp 1,957,725, it turns out the company's decision to accept special orders is appropriate.
