ABSTRACT:
R & D NutriSari is one department of the Division NutriSari PT Nutrifood Indonesia, which located in Bogor Ciawi roadway. During this R & D NutriSari have application programs that have not been able to give the maximum contribution in the evaluation of data storage of raw materials. In scientific writing, the author improve the application of Raw Material Evaluation by first analyzing the current system, followed by making the system proposal and designing systems. To clarify this scientific writing, the authors include the basic theory and system design are several theories which are used as a tool for designing systems that can ultimately produce an application program that supports the work.
