ABSTRACT:
Controlling labor costs can be done in various ways, one way is used to analyze or group should compare the costs and time in standarkan with both costs and time that really happened. Direct labor cost difference is caused by differences in actual tariff rates on standarkan, whereas the difference in efficiency caused by the differences of labor on a product. The objective is to find out how to control and calculation of labor costs in the production of PT box panel Trimarta Pratama Duta. Scientific writing is to discuss the analysis of labor cost difference between standard and actual labor costs by using the method of difference analysis.
