key words: film information website, macromedia dreamweaver 8, php and mysql

ABSTRACT:
Scientific writing, the writer discusses the making of a website about Film Information. Now is the development of the entertainment world in Indonesia grew rapidly, marked by many emerging films Indonesian directors work, it is so admirable in the country where the film was able to compete with films from overseas. Namum very unfortunate dissemination of information regarding the film has not been maximized. One way to provide maximum information to the community is to create a website that contains information about the film. This website is created using Macromedia Dreamweaver 8 as a web editor, Adobe Photoshop 7.0 as a design editor, and PHP as a script to connect to a MySQL database.
