ABSTRACT :
Badminton is very popular sport in Indonesia, almost all the people in Indonesia are not familiar with this game. Not everyone who plays this sport understand the good and right basic techniques in badminton, this could harm themselves because without any skills and knowledge of the play can cause injury. There have been many books that describe the basic techniques of badminton is accompanied with attractive pictures, but it was not enough to add the reader interest to read and learn more about the basic techniques of badminton. With today's advances technology, some people want something different that may cause a sense of curiosity and big desiren to find out more information from the easiest media to be understood and comprehended in a different view. It is expected these applications can help users in finding out the basic technique of badminton using Application CD that can be viewed repeatedly and introduce computer technology in this application usage.
