ABSTRACT:
At this very rapid technological development, Especially in the field of information technology, computer usage is needed to find him an example of information we can know some information through a website. At this moment is still very little information about endangered animals in Indonesia, and the existence of a program Macromedia Flash MX application I would create a web site. In scientific writing will be discussed about making a website about endangered animals in Indonesia with Macromedia Flash Mx which can facilitate someone to memdapatkan information about hewan rare in Indonesia, and is quite interactive website because in it is accompanied by animation that makes it looks more beautiful, the information contained therein could also be easily obtained by clicking on the menu available on the screen.
